📝 SUMMARY

Dynamic Full Stack Developer pursuing an MCA at DYPIMR, Pune, with expertise in the **MERN** stack (MongoDB, Express, React, Node.js), OOP languages like C++ and Java, and proficiency in Linux, Bash, and Git. Skilled in building **high-performance**, **SEO-friendly**, and **scalable** web applications, I have hands-on experience **leading teams**, **optimizing performance**, and delivering projects under **tight deadlines**. With additional skills in Figma prototyping and design, I thrive on mastering new technologies to drive **innovation** and **business growth**.

💼 EXPERIENCE

InnoSquares
June 2024 - December 2024

Full Stack Trainee
Pune, Maharashtra, India

🔗 https://innosquares.com/

- I've **led a 12-member team** over 2 weeks, ensuring successful and timely project delivery.
- Achieved **100% accuracy** in QA review for AI/ML model refinement tasks, specifically in coding, maintaining high performance in subsequent evaluations.
- Developed Frontend & backend integration for the Innoasr dashboard(Employee Performance Tracking) project, identifying **5 underperforming employees** and prompting performance improvements across the organization.
- **Led collaboration** with frontend and backend teams for data prep and backend integration. Presented demos to key stakeholders at **Accedian** & **Cisco**, which led to securing a contract from **Cisco** for the Realtime Network Analysis Dashboard project, delivered **3 months** of POC work in **~20 Days**.

Hacktoberfest
October 2022, 23, 24

Open Source Contributor
Remote

🔗 https://hacktoberfest.com/

Completed GitHub's Hacktoberfest **thrice**, & contributed to many Open Source Projects, more details on my GitHub Profile: https://github.com/nisoojadhav
